THE PRODUCT GROUP

ABOUT US

In 1970, Muhammad Nasir Vohra launched The Product Group with a bicycle, a desk, and 1,000 rupees. Today, his legacy powers one of South Asia's most trusted trading platforms for chemicals, polymers, and agri-commodities.

From Karachi, Dubai and Seoul to Antwerp, London and Milan, our companies operate in ten countries with on-ground teams managing sourcing, compliance, and execution for institutional buyers. Through GTCL, SPC, and PG Commodities, we move high-stakes goods with zero noise and total control.

We deliver over 200,000 metric tons of industrial and textile chemicals across Pakistan every year; making us the country's largest textile chemical trading house. Our network handles the entire trade stack: LC negotiation, port clearance, technical validation, and customer-side formulation guidance.

What makes us different? We don't represent catalogues. We represent principals. Over 50 long-term producer partnerships across Asia and Europe trust us to carry their brands across borders, safeguard their capital, and grow their presence in South Asia.

Fifty years on, we still operate like we did on day one: fast, discreet, and built to last.

THE PRODUCT GROUP

OUR INDUSTRIES

Petrochemicals

The Product Group is active in the trading and distribution of core petrochemical inputs, primarily Monoethylene Glycol and Diethylene Glycol. These products serve critical downstream industries including textiles, polymers, and industrial manufacturing. The Group's involvement is anchored in long standing technical understanding of petrochemistry and market dynamics.

Specialty Textile Chemicals

A major supplier to Pakistan's textile sector, The Product Group, with its partnership with Devan Chemicals in Belgium and Soft Chemicals in Italy, supports large scale manufacturers with specialty textile chemicals used across dyeing and finishing operations. Its customer base includes Interloop, Asia's largest sock manufacturer and a global textile exporter, reflecting the Group's ability to meet demanding technical, quality, and reliability standards.

Agri Commodities

Engaged in international agri commodity trade with a clear export orientation. The Product Group focuses on origin sourcing, quality alignment, and disciplined execution to support overseas buyers across food and feed applications.

Glass and Aluminum Fabrications

Through a strategic partnership with **Emirates Glass**, the UAE's largest glass manufacturer, The Product Group participates in the supply and fabrication of glass and aluminum solutions for commercial and industrial projects, supporting regional construction and infrastructure demand.

PVC

The Product Group is involved in the manufacturing of PVC pipes serving infrastructure and industrial applications. Its operations have supplied major international organizations, including Mitsubishi, underscoring adherence to technical specifications and execution standards required by global counterparts.

Polymers

Founded by Muhammad Nasir Vohra, Pakistan's first Polymer Technologist, The Product Group's polymer activities are built on foundational technical expertise. This heritage continues to shape the Group's approach to polymer trading, application understanding, and customer support across manufacturing sectors.

MISSION STATEMENT

PGCom exists to connect agricultural producers to global markets with discipline, integrity, and execution certainty.

We operate at the intersection of origin and demand, focusing on export driven trade where consistency, compliance, and trust matter more than noise. Our mission is not to chase scale for its own sake, but to build long term trade relationships rooted in reliability, transparency, and deep operational understanding.

We believe agricultural trade succeeds when execution is boring and outcomes are predictable.

That belief shapes everything we do.

From sesame seeds supplied to regulated European markets, to feed grade corn positioned for livestock supply chains, our focus remains the same. Understand the market. Respect the standards. Deliver exactly what was agreed.

PGCom is built for buyers who value clarity over hype, process over promises, and partners who understand that in global trade, reputation compounds slowly and collapses instantly.

Our mission is simple.

To be the most dependable export partner our customers work with, and the most responsible international representative our producers rely on.

WHY OUR SERVICES?

PG Commodities exists to remove friction from agricultural exports. We operate as a disciplined trade partner, not a broker passing paper. Our role is to ensure that what leaves origin arrives exactly as specified, on time, and in compliance with the expectations of international buyers.

OUR CERTIFICATIONS

Our Products

SESAME SEEDS

Natural White Sesame Seeds (Sortex)

Physical & Chemical Specifications

- Purity: 99.97% minimum
- Foreign matter: $\leq 0.03\%$
- Moisture content: 6.0% maximum
- Oil content (dry basis): 48% minimum
- Free Fatty Acid (as Oleic Acid): 1.5% maximum

Sensory Characteristics

- Color: Uniform creamy white to light ivory
- Odor: Sweet, nutty
- Taste: Nutty; free from bitterness or rancidity

Natural White Sesame Seeds (Hulled)

Physical & Chemical Specifications

- Purity: 99.97% minimum
- Foreign matter: $\leq 0.03\%$
- Moisture content: 5.0% maximum
- Oil content (dry basis): 52% minimum
- Free Fatty Acid (FFA): 1.5% maximum

Sensory Characteristics

- Color: Bright, uniform white
- Odor: Characteristic, sweet, nutty; free from rancidity
- Taste: Mild, clean, nutty flavor

Packaging Options: PP Bags, 15kg Paper Bags, 25kg PP Bags

Pre-shipment inspection and accredited lab testing available upon request

EGGS

Size Classification

- Small: 48–54 grams
- Medium: 54–61 grams
- Large: 61 grams and above

Packaging

- 360 eggs per carton (12 trays)
- Packaging material: 5-ply food-grade corrugated cartons

Storage Conditions

- Temperature range: 4°C to -10°C
- Applicable during both warehouse storage and transit

Physical Characteristics

- Appearance: Fresh chicken hen eggs (shell)
- Shell color: White
- Yolk color: Yellow

Pre-shipment inspection and accredited lab testing available upon request

POTATOS

Specifications

- Grade: A
- Stock status: New / Storage
- Washed: Yes
- Pack size: As per customer requirement
- Storage: Room temperature (approx. 10°C where specified)
- Breed name: Muzika
- Size: 80 grams and above
- Shape: Long
- Color: Golden

Processing Options

- Washed
- Unwashed

Packaging Options

Washed

- 3 kg Mesh Bag
- 5 kg Mesh Bag
- 9 kg Mesh Bag
- 18 kg Mesh Bag

Unwashed

- 18 kg Jute Bag

Pre-shipment inspection and accredited lab testing available upon request

CORN (MAIZE)

Product Specifications

- Grade: Feed Grade
- Crop Season: Spring
- Moisture Content: 12–14%
- Aflatoxin: Below 20 ppb
- Storage Conditions: Dry and ventilated environment

Packaging Options

- 50 kg PP bags
- Bulk in Container (BIC)

Cargo Treatment

- Fumigated during storage and transit
- Fumigation as per customer requirements

Pre-shipment inspection and accredited lab testing available upon request

RICE

Packaging Size Options

- 1 kg customer-branded bags
- 2 kg customer-branded bags
- 5 kg customer-branded bags
- 25 kg neutral wholesale bags
- 50 kg neutral wholesale bags

Packaging Material Options

- Plain PP bags
- China laminate PP bags
- Non-woven bags

Breeds Available

- 1121 Extra Long Grain Parboiled Rice
- 1121 Extra Long Grain Rice
- Super Kernel Basmati Rice
- Super Kernel Basmati Rice Parboiled
- D 86 Basmati Rice
- Blended Biryani Rice
- Blend ratios adjustable based on price and application requirements

Pre-shipment inspection and accredited lab testing available upon request

RED ONION

Product Specifications

- Vegetable Shape: Dome
- Vegetable Color: Pink/Red
- Place of Origin: Pakistan
- Style: Fresh

Size Grades

- 25–40 mm
- 40–55 mm
- 55 mm and above

Packaging Options

- 3 kg mesh bags
- 5 kg mesh bags
- 9 kg mesh bags
- 18 kg mesh bags

Pre-shipment inspection and accredited lab testing available upon request
